

DIGITAL WORKPLACE IN THE DIGITAL TRANSFORMATION

Communicating and working together
securely and efficiently wherever we are

FICHTNER
IT CONSULTING

Working together in the digital reality

We have all experienced over the past weeks and months that new ways of working together are both essential and feasible. And that these aren't just associated with loss, sacrifice and disadvantages, but can also result in faster reactions, condensed communication and teamwork, and better coordination and documentation of results. However, that's provided we use the right tools to optimize processes and to operate successfully in a networked environment.

Promoting knowledge management and collaboration

The key to successful implementation of the digital transformation is to enable employees to handle information and knowledge better and to work with other stakeholders to

enhance it. Teamwork is consequently the second factor in the success of the transformation: The frequency and amplitude of interaction increase and so too the need to strengthen both.

Platforms in the network economy

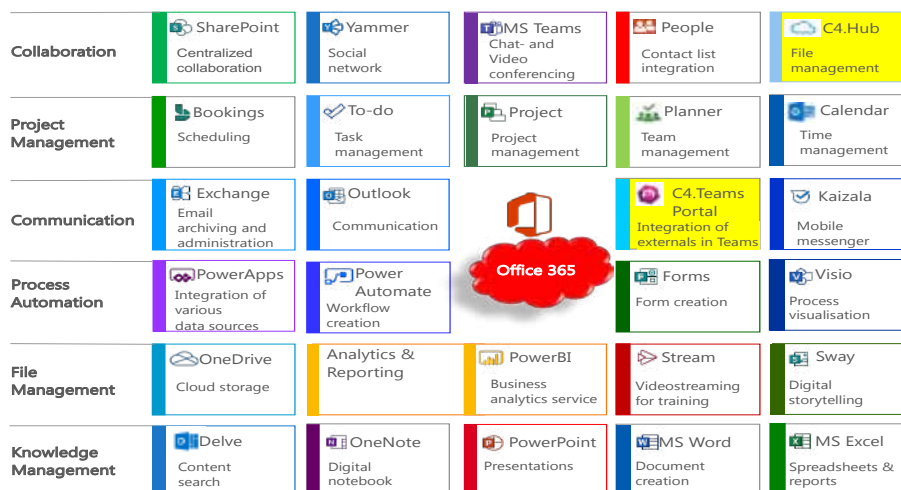

The value of a solution increases with the value of the underlying platform. That's why it makes sense to align oneself with the leading platform for processing information and communications: Microsoft 365 is a genuine promoter of knowledge processing and cooperation amidst the challenges of the digital trans-

formation. In order to make even better use of this platform and to tailor it to your specific needs, we have developed smart components that not only make your work at the digital workplace easier, but also dock onto your company processes.

All in one place: Store and retrieve information and documents with ease

Our c4.Hub is your guide through the huge variety of documents you handle. The c4.Hub provides a standardized front-end as an extension of your SharePoint and Microsoft 365 environment, allowing you to store and automatically channel do-

cuments – in line with rules – per drag & drop, whether with Outlook, Teams, SharePoint or your file system. The c4.Hub offers employees a central platform, and the smart search function enables you to retrieve it all again.

Microsoft 365 als mächtige Business Plattform

The common meeting place for you, your customers and partners

Our c4.TeamsPortal allows you to easily integrate customers, partners, suppliers, etc. securely and efficiently into your Microsoft Teams environment. Communication and collaboration are facilitated without any additional installation work at your part-

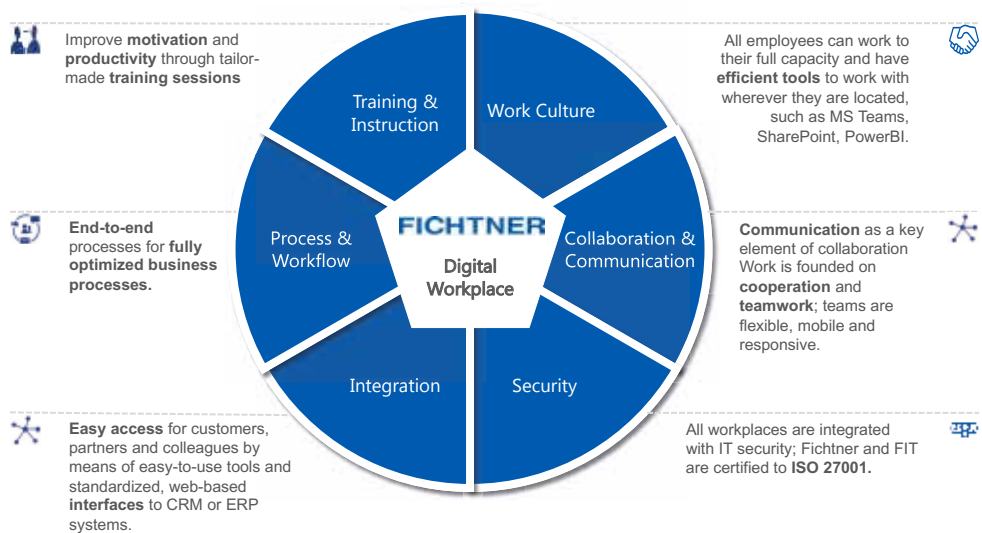

ners. The portal opens up the functional universe of the leading business platform for exchanging files and information to all project participants.

End-to-end shaping of the digital transformation

Both the c4.Hub and the TeamsPortal are vital components that enable us to integrate individual workstations into overarching processes. The c4.Hub functions as the „digital mailroom“ from where documents can be channeled to any workflow and transaction system for further processing. The c4.TeamsPortal is the interface for integrating the supply chain or partner network

into your internal processes. Both solutions create transparency and provide functions to digitalize business processes across companies in the sense of end-to-end integration. They increase the degree of freedom and the speed with which we can utilize them to drive forward implementation of the digital transformation.

Fichtner Digital Workplace Portfolio

Fit for Microsoft 365: Training sessions for the digital workplace

In addition to working closely with your staff, we offer tailor-made workshops and training sessions to help you accelerate rollout of the solution, but also to discover together how we

can better tailor the multitude of opportunities offered by the Microsoft 365 platform to your needs and requirements.

Competence Center Fichtner Digital Business Consulting & Microsoft Business Solutions

Together, our two competence centers help with the conception, shaping and implementation of digital transformations. We offer you proven methods, great examples and successful solutions based on Microsoft 365 to integrate fully customized strategies, processes and products for the digital workplace and digital processes efficiently.

FICHTNER

IT CONSULTING

Fichtner IT Consulting GmbH (FIT for short) is the Fichtner Group's center of competence for IT. Among other things, we design and implement information logistics for technical networks, plants and infrastructure. We also bundle our industry knowledge and process know-how to optimize the customer communication of our partners in the energy industry by deploying digital solutions and to realize new value added potentials for them.
