Product Presentation

Fichtner AIDA (AI driven Document management Automation)

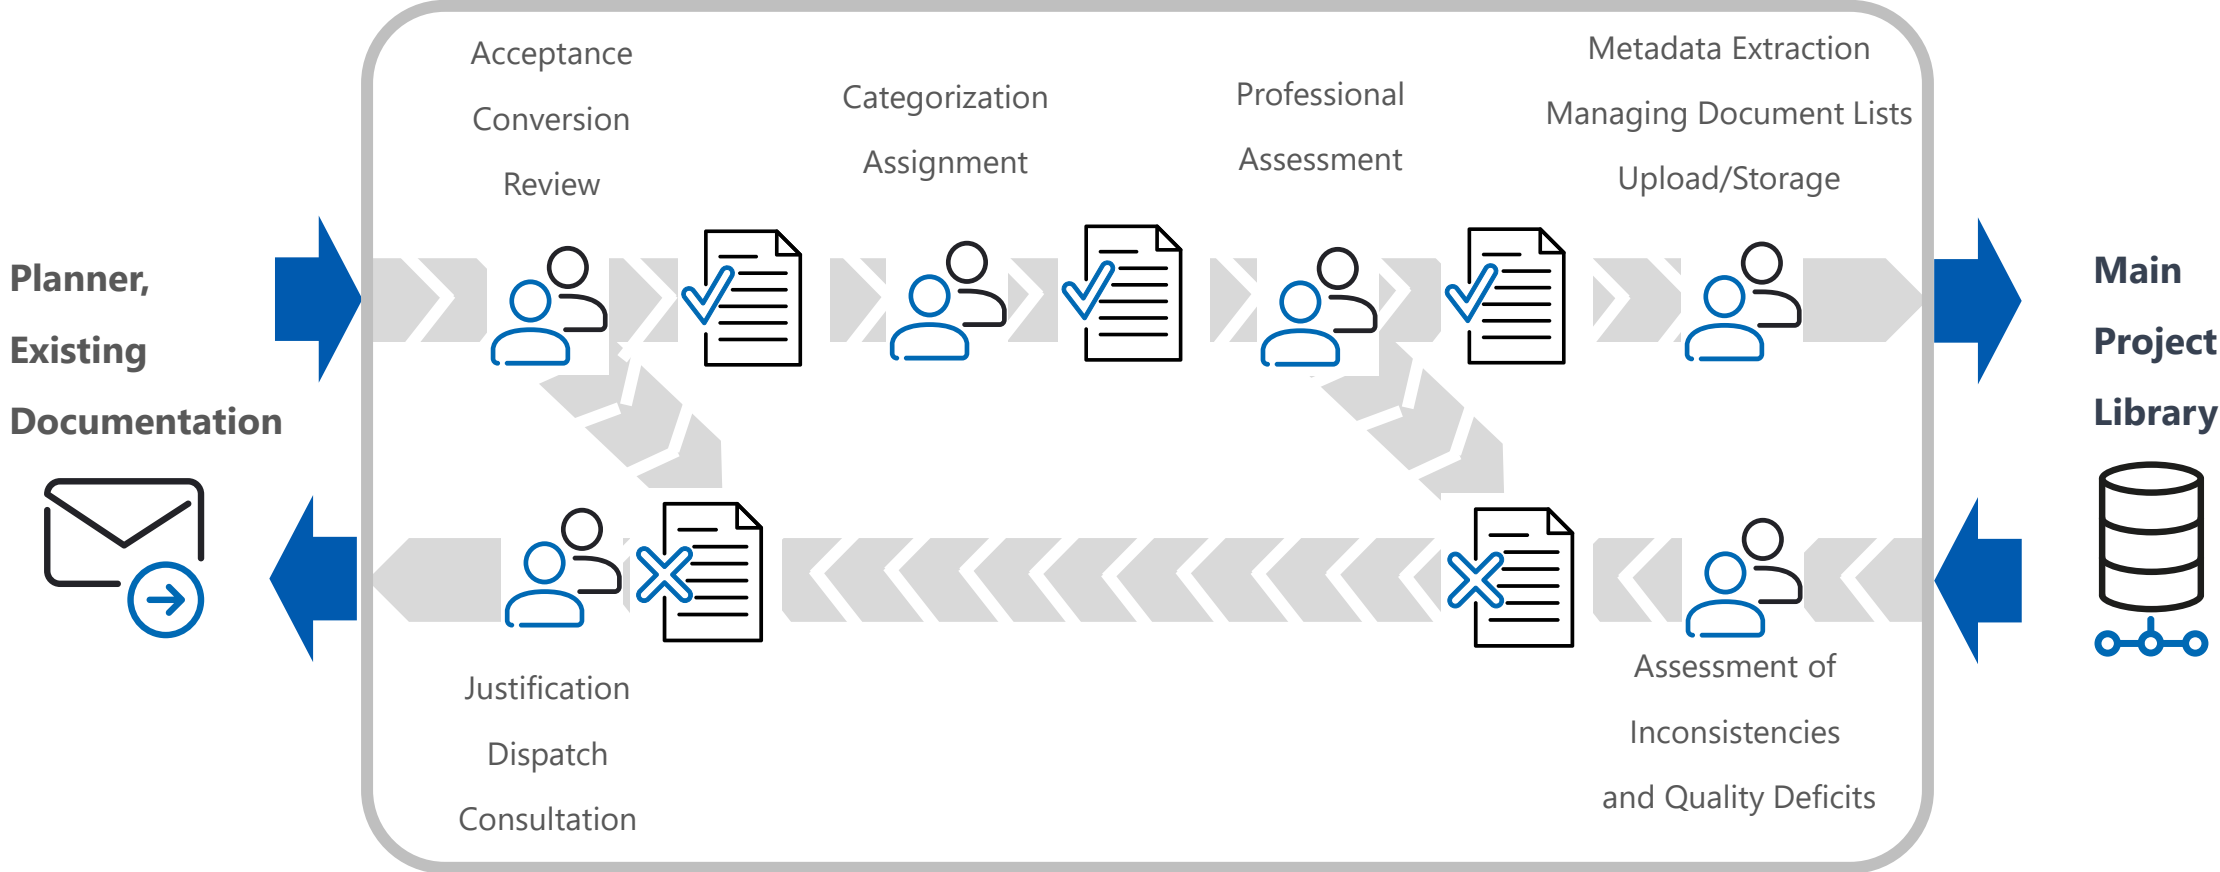

FICHTNER
IT CONSULTING

ENGINEERING + CONSULTING

Document management is a fundamental part of planning and construction projects of linear infrastructures

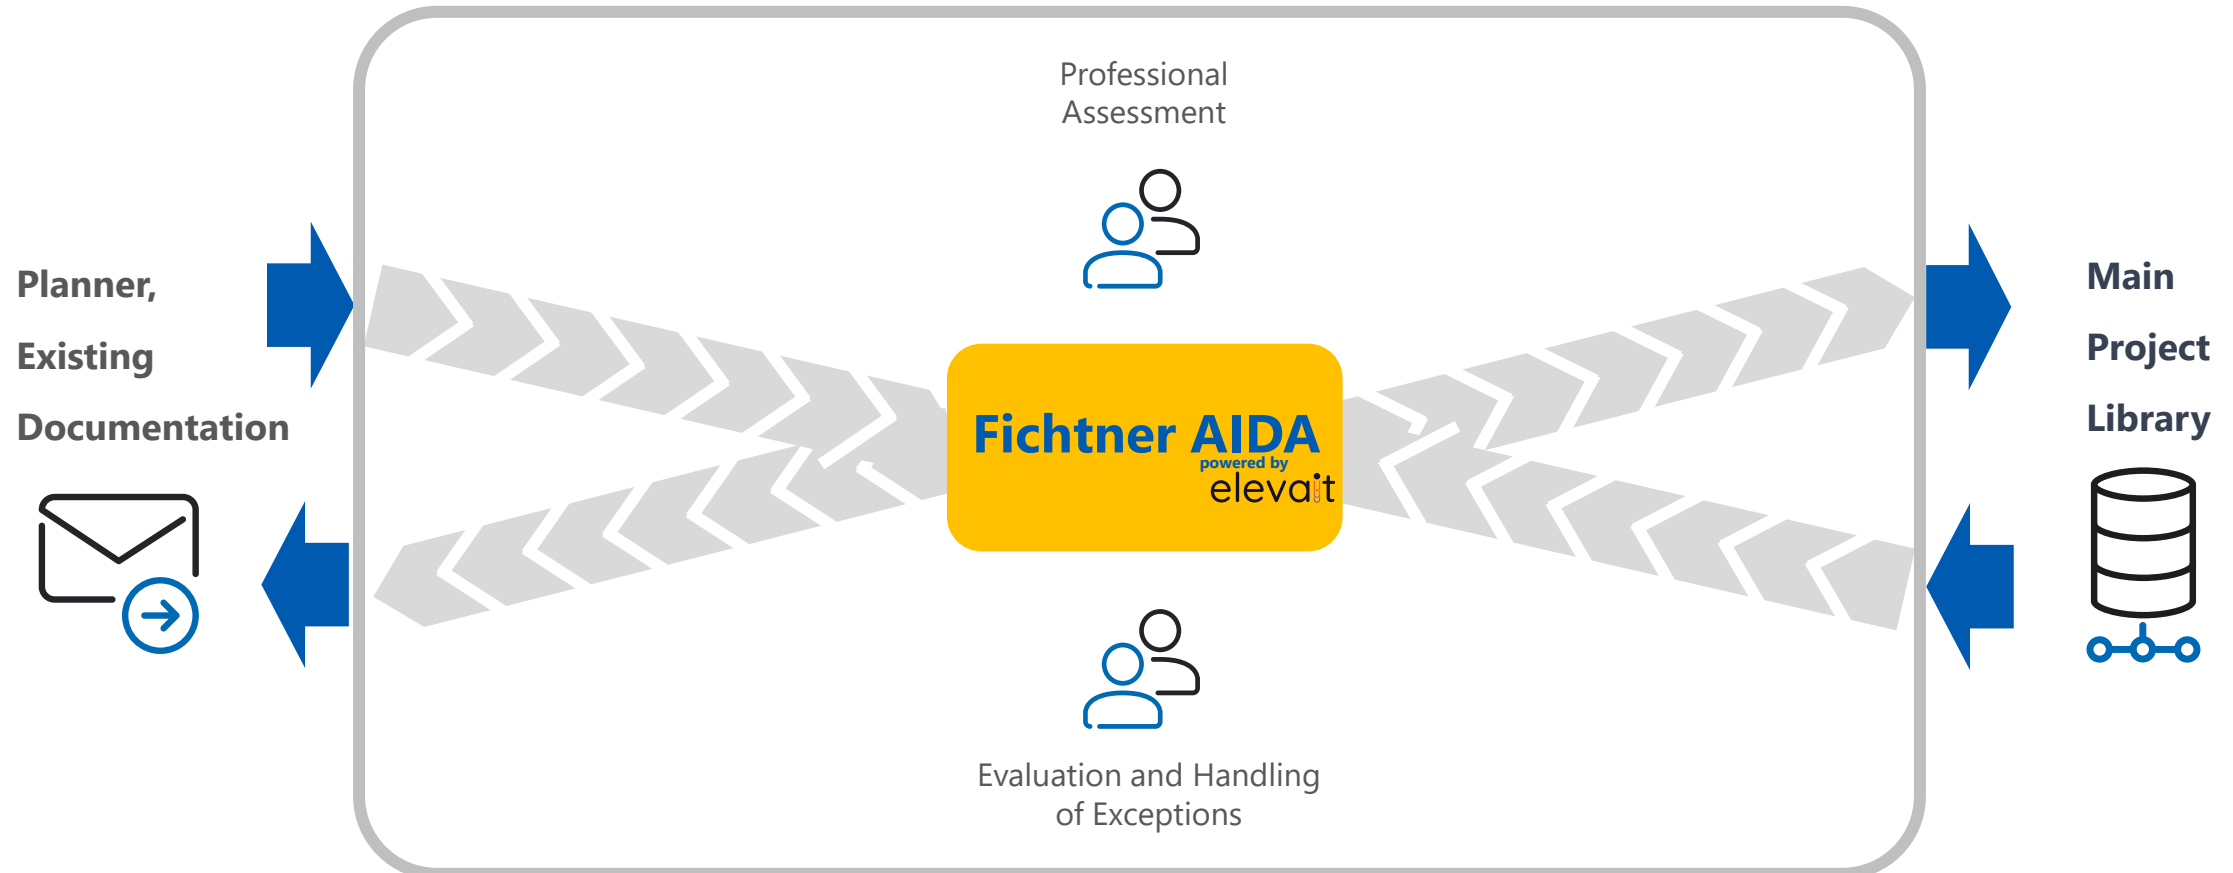

Numerous manual steps are included

Fichtner AIDA significantly reduces manual tasks in document management and improves the quality of outcomes

Manual activities are minimized, thereby freeing experts for qualified tasks

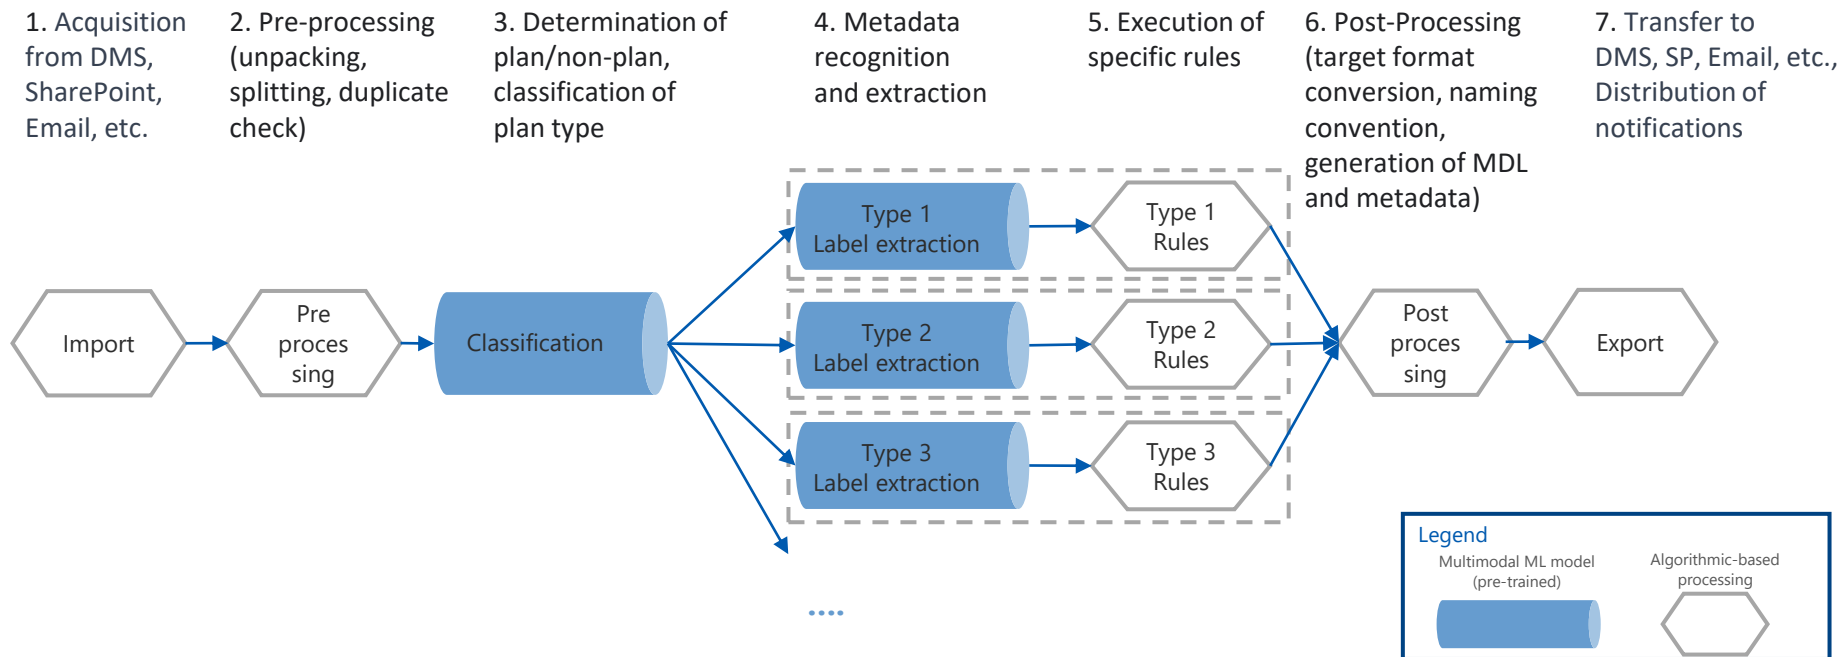

Fichtner AIDA provides an AI-based pipeline for seamless document processes in planning and construction procedures

AI/Knowledge Graphs pre-trained across multiple ontology levels

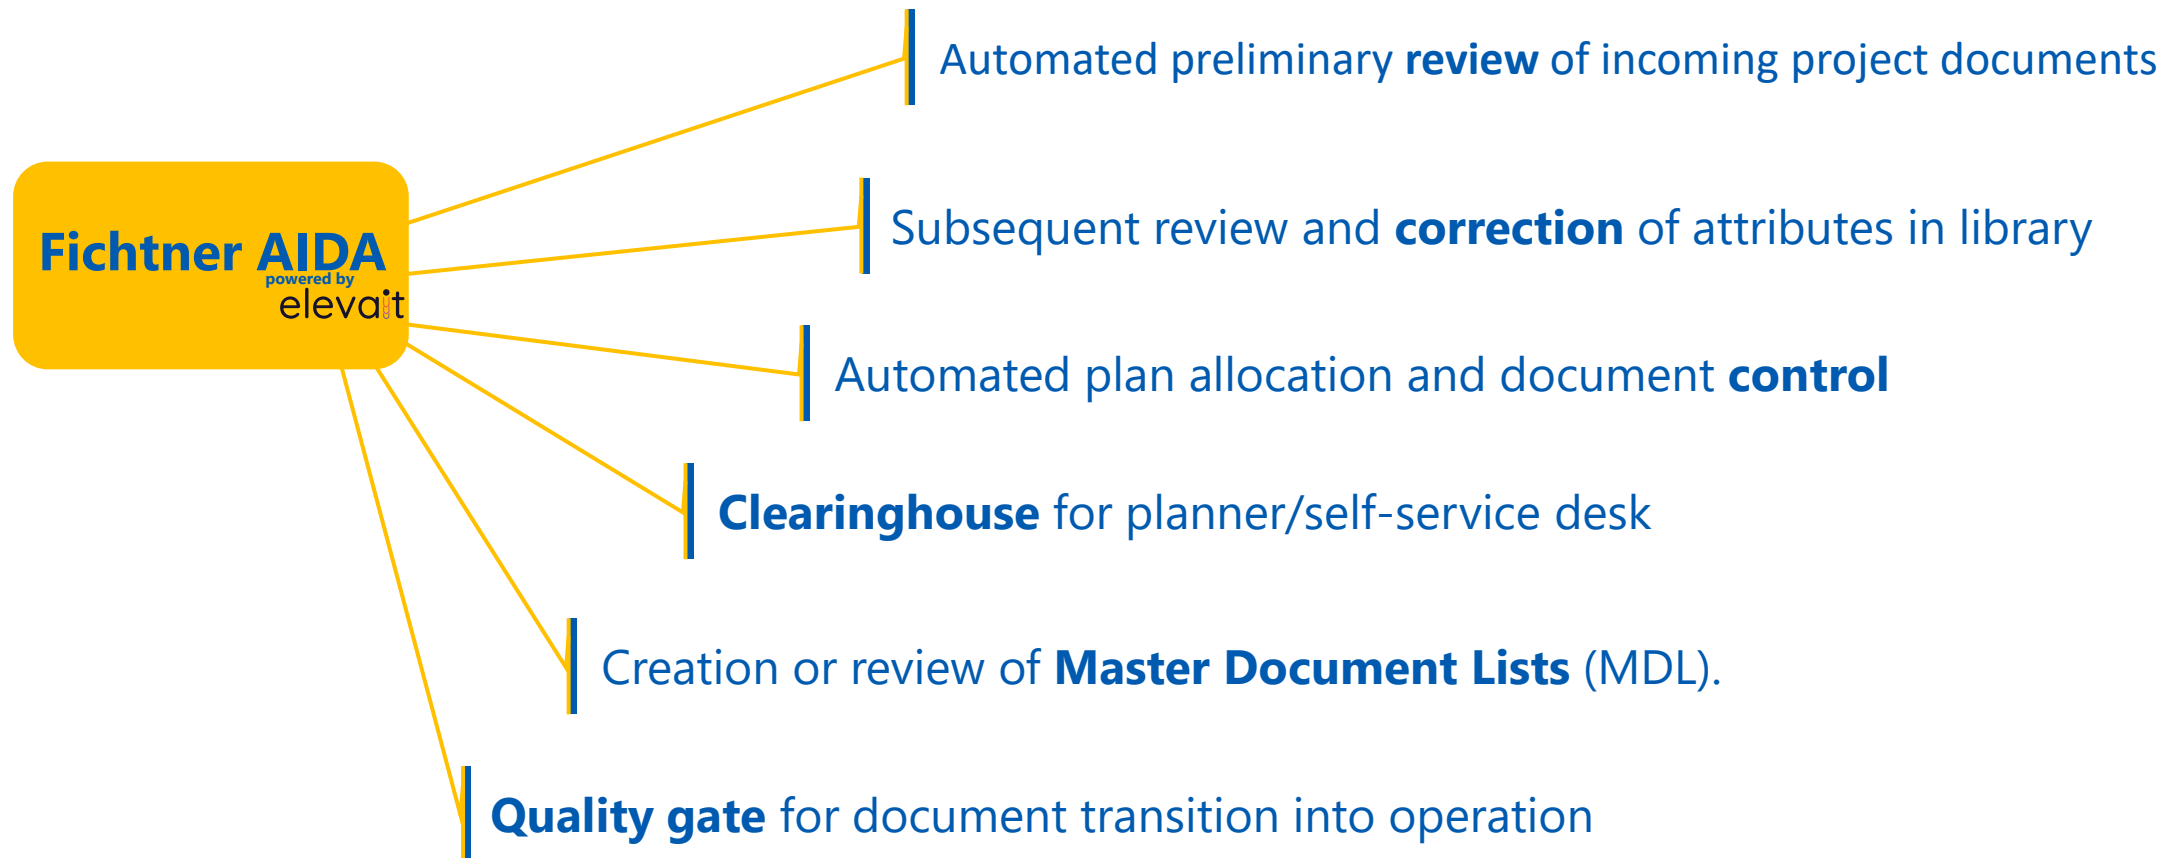

Fichtner AIDA
powered by
elevation

A whole range of business scenarios are supported and enhanced by Fichtner AIDA

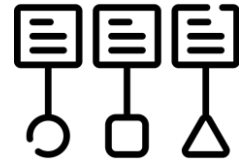

Sample of deployment scenarios in document management

Project example: Deployment in power line plan management shows savings of up to 80%

Hundreds of documents per week with a review and correction effort of more than 1 hour each
